

It's worth it!

EUROPEAN DAY OF AWAKENINGS OCTOBER 7TH 2020

www.studioarco.it

After the isolation that we all had to face because of the pandemic, the “National Day of awakenings on coma research – It’s worth it”, has a greater meaning this year. It is promoted by “Gli amici di Luca” organizzazione di volontariato (Friends of Luca voluntary organization), that comes to the goal of its 22th edition and it celebrates the 6th “European Day of Awakenings”.

This particularly difficult moment that had repercussions even in the tertiary sector has obliged our association to make deep evaluations without suspending the relationships with our patients with outcomes from brain injuries who returned home on the territory and their relatives, trying to make feel our affinity and support from remote.

Now that we are gradually coming back to a new normality, by shared registers with institutions to preserve the health of all the citizens, we are about to celebrate the next DAY OF AWAKENINGS with an improved energy and equal dedication. The pathologies we are taking care of cannot be left behind, not even just because they are indirectly struck by the pandemic that has diverted attentions and resources from them. Patients with outcomes from coma and severe acquired brain injuries do urgently now require greater attention in order to make their rights and problems be visible and their needs to be constantly and consciously identified by institutions in charge.

On October 7th the next “Day of awakenings” will deal with the above-mentioned issues and it will analyse social and clinical themes about research. It will be done through the social campaign of our testimonial Alessandro Bergonzoni and two webinar conferences on “BIOETHICS AND THE FIVE SENSES” and the perspectives of the second “NATIONAL CONFERENCE ON CONSENSUS OF THE ASSOCIATIONS” that represent the relatives taking care of patient in coma, vegetative state or ABI. Furthermore, the theatre company Gli amici di Luca composed by patients who came out from coma will bring their own experience in a new performance called “Absences: diversimili in progress”, (Different-similar in progress) set up on the occasion at the Teatro Dehon in Bologna.

The event of information on coma, the vegetative state and severe acquired brain injuries once again creates networks with different Italian cities and other European countries, to make public opinion aware, give voice to patients with outcomes from coma and their families, shed light on criticalities of the care and analyse new frontiers of research.

Since 1999 this initiative has reinforced in time and it has took on a European dimension thanks to the projects carried out by the association through the synergy with the institutions, partner countries and the patronage of the European parliament that has joined the historical High Patronage of the President of the Republic.

The “Day of Awakenings” is born from the project of the “Casa dei Risvegli Luca De Nigris” (Luca De Nigris House of Awakenings) that is shared with the Municipality of Bologna. This public centre of the Local Health Authority is specialised in innovative rehabilitation and research and it is unique in Europe; it is part of the area of the hospital “Bellaria” and it strengthens a new philosophy of the cure and enhances the central role of the family.

The Association Gli amici di Luca is present in the “Osservatorio Nazionale sulla Condizione delle Persone con Disabilità” (National Observatory on the conditions of persons with disability) and it is involved in the application of the action plan that endorses the United Nations Convention on the rights of patients with disabilities and the commitment on equal opportunities of disadvantaged patients.

THE FRIENDS OF LUCA AND THE CITY: HOW TO OUTCOME COMA AND COME BACK TO LIFE

Presentation of the project:

LA BOTTEGA DELLE MANI E DELLA MENTE (The hand and mind workshop)

The recovery of social life after the experience of the House of Awakenings Luca De Nigris sometimes notices very severe obstacles inside the family unit who hosts the patient with severe residual disabilities. Patients have to face the new kind of life and to create different balances after the traumatic event. Among these difficulties, there is the problem of how to spend spare time.

This project, supported by the Curia of Bologna, organizes and carries out rehabilitative laboratories and group resocialisation projects both for the patient with disabilities and the caregiver.

partners:

Since 2003 the Association is active in the field of cultural activities (theatre, music, cinema, editing and publication of books) finalized to the reacquisition of competences and abilities of fragile patients (mainly with outcomes from coma). In 2004 the “Space of the Arts” was created at the House of Awakenings Luca De Nigris: a place where it is possible to express and experiment, that from its “protected” and “involved” dimensions it intends to open mainly to the outside, towards those who are “not involved”.

The performance “**Assenze: diversimili in progress**” (*Absences: different-similar in progress*) is born within the scope of the project “**Diversimili: coma to community**” (*Different-similar project: coma to community*) co-funded by the European Union, European Social Fund, Operational Program Metropolitan Cities 2014-2020. planning ability that considers to realise workshops of theatre, music, audiovisual and awareness action will take place through programmed events between the House of Awakenings Luca De Nigris, the spaces in the Neighborhood, the High Schools, the University and the City Theatres. The intention is to intercept a welcoming and involving community and to integrate it with the “marginality” through activities directed to patients with disorders and outcomes from coma. The performance enhances the criticalities experienced during the lockdown that have forced us to revise our interventions without losing the relationships, the contacts and the expressive potentialities of the participants.

PHOTOGRAPHIC EXHIBITION

I AM AMLE TO BUT I HAVE THAT WITHIN WHICH PASSES SHOW THESE BUT THE TRAPPINGS AND THE SUITS OF WOE

Realised by the Associazione Fotografica Tempo e Diaframma curated by Gabriele Fiolo

The long experience with Hamlet has produced a photographic exhibition that tells the creative and descriptive path realised through the theatre lab, an instrument used to go along with fragile patients on their way to recover, to tighten and reinforce relations that bring them out of social isolation.

I AM AMLETO is the moment in which every participant has confronted themselves with their competences and relational abilities drawing gratification. It is also a support for those memories that are easily lost if they are not supported. This exhibition is realised by the photographers Gabriele Fiolo and Cristina Ferri, for the association Tempo e Diaframma.

THE STATE OF THE ARTS

The convention is a further step to get close to the “Second National Convention on Consensus” promoted by the associations that represent the relatives taking care of a patient in coma, vegetative state, minimally conscious state and severe acquired brain injury.

It all started on February 9th, 2019 in Rome in the Auditorium of the Ministry of Health on the occasion of the “National Day of Vegetative States” and through different steps, despite the lockdown. The path has now been resumed on this webinar realised for the Day of Awakenings. The coordination of work groups formed by representatives of the associations and specialists will explain the state of the arts of work; they will confront with the scientific and technical committee trying to answer to relatives’ needs, the questions arising from their role, for quality indicators shared between the health world and that of the associations. A convention on unsatisfied needs and on expected, but still suspended results should end on October 7th, 2021 with a document validated by the jury and shared with the institutions.
